

Universal School Art Club

Mission Statement

The Universal School Art Club is committed to providing a creative environment for students where they can explore the arts in a supportive and encouraging setting amongst their peers. The Art Club will be a space free from negativity and will focus on the positive attributes that each student will contribute to the club.

Students will be guided through a specific set of artistic skills that are designed to instill self confidence in their work bringing forward their creativity in critical thinking and reasoning. Art is a tool that not only fosters this creativity but will spill over into their academic achievements. Students who participate in an art program are more likely to see advantageous reverberations in math, science and language arts, of which can positively affect the entirety of their scholastic career. It is our hopeful expectation, with the introduction of the Universal School Art Club, to initiate and perpetuate the ripples of success for our students!
